

St. Stephens Church

Use: Library & Technology Center

Features:

- * T1-11 Siding with matching mansard
- * Double insulated Vertical Slider windows
- * Commercial Steel Doors with 1/2 lite
- * Tile Floor
- * Vinyl Gypsum Walls

Background:

Saint Stephens Church needed to expand their current library as well as create a new technology center for their students. It was also important that there be a conference/meeting room for the parishioners. The architectural quality of the new structure was a large concern for the church because they are located in a highly residential area. They had to be cognizant of the neighbors concerns and abide by very strict neighborhood covenants.
