

Project Profile | Contanda

Use: Offices for Terminal Manager & Employees

Location: Baltimore, MD

Size: Approximately 1,440 Sq. Ft.

Need:

The customer needed to remove and replace their existing doublewide with a new building. They were concerned about their old building having mold issues. In addition to the speed factor, the customer chose modular since there are too many restrictions involved at the port to site build.

Solution:

Wilmot was able to provide a great solution to their need because we were able to get rid of their existing building and bring in a new one with additional upgrades to what they had.

Features:

- **Maintenance free High-Rib steel**
- **Mansard with concealed roof drains to downspouts**
- **Special receptacles for monitors and TV's**
- **Special server room with A/C to control temperature**
- **Custom reception area**
- **Kitchenette**
