

PROJECT PROFILE |

Custom Modular Buildings- Two Stories

USE: Office Space

SIZE: (6) 2-Story Buildings 17,280 Sq. Ft. Total

NEED

The customer had a limited footprint for expansion of additional offices and needed to design around any requirement for fire suppression. They were also in need of something that was temporary and most importantly could be relocated.

SOLUTION

In order to work with the limited footprint that the customer had to expand for additional offices, Wilmot built vertically to maximize space and efficiency for the customer. Wilmot provided a total of (6) 2-Story Modular Buildings. Phase I encompassed (4) 2-Story Buildings @ 2,880 Sq. Ft. each, for a total of 11,520 sq. ft. Phase II included (2) 2-Story Buildings @ 2,880 Sq. Ft. each for a total of 5,760 Sq. Ft. The total project square footage was 17,280 Sq. Ft.

FEATURES

- Perimeter Frames
- Clear Span
- High Rib Steel Exterior Finish
- VCT Flooring
- VCG Walls
- T-Grid Ceilings
- Solid Core Interior Doors
- Low E Windows
- Wall Mounted HVAC Units
