

PROJECT PROFILE |

Morgan State University Guard Booth

USE: Security Guard Booth
SIZE: 4' x 8'

NEED

The customer was concerned about the rise in violence in their town. Because of this, they reached out to Wilmot to design a custom guard house to position at the entrance of their establishment. In addition to the added security, they wanted a structure that was aesthetically pleasing and would match the exterior façade of their existing building.

SOLUTION & FEATURES

Wilmot was able to custom design a guard booth for the customer that matched the aesthetics of the original building. The guard booth was positioned at the parking lot entrance so that all visitors could be screened prior to entry, which created the extra security element they were looking to achieve.

- Custom Design
- Brick façade to match the existing building's exterior
- Central HVAC
