

PROJECT PROFILE |

Educational Facility – Tidewater Community College

USE: Classrooms & Faculty Office Space
SIZE: Approximately 30,000 Square feet

NEED

Tidewater Community College was growing at a rate between 17% - 20% per year. They did not have the space to support the heavy demand of student enrollment. They required a 30K Sq. Ft. of classroom and faculty office space.

SOLUTION

After being short-listed bidders, Wilmot was ultimately selected as the best value solution to help the school meet its needs by August 18th of that year. Our team excavated and poured the foundations, installed the two buildings approximately 30K Sq.Ft. and received a Use Occupancy Permit within that short period of time. Features Include:

- Full Site Development to include Storm Water Management, Sediment/Erosion Controls, Permitting, Flatwork, Foundation Design & Installation, 800 LF Fire Lane
- Class A Education and Office Space to support 500 occupants
- Custom 3-Phase Interior Wiring
- Hardipanel exterior finish with custom brick-pattern
