Secure emergency space fast in times of disaster.

What Wilmot can offer:

- 24/7 on-call Account Managers
- 24 hour response to an emergency space requirement
- Units that are fully equipped and ready for occupancy
- Climate-controlled for guaranteed year round comfort
- Emergency ground-level storage containers to secure your critical property
- Solar powered storage and office containers for off-grid locations

Emergency Space Needs

An emergency preparedness plan is important for all Facility Managers. But time doesn't always allow for a proper preventive analysis of your essential square footage, equipment, and personnel needed to keep your company running while your operations are impacted.

Wilmot is your source for modular structures for all your emergency space needs. Whether that's "Hot Sites" that are fully functioning and scaled for emergencies, or simply the reassurance of knowing that space can be rushed to you in your time of need. Our Space Planners are well-known for their excellence in customer service and are ready to help meet your needs!

We meet our customer's time sensitive deadlines

At the peak of the COVID-19 pandemic, a local convention center, repurposed as a makeshift hospital for COVID-19 patients, urgently required portable showers. These were essential for medical staff to decontaminate after their shifts. Wilmot Modular responded promptly by designing and constructing a high-quality shower container, ensuring rapid delivery and meeting our customer's time-sensitive deadline.
